

ERIC OLAVESON

WEB DEVELOPER

RESUME

E O

PROJECTS

Raw Trails Oct 2018
Individual Project – Live Website

SPA for a small business that includes both client facing website to find and book guided trips and administrative side to control scheduling and allocate equipment. It's written in SERN stack primarily, while also utilizing tech such as Auth0, Stripe, Nodemailer, Google maps API, and YouTube API. Received award for best UI/UX at DevMountain.

Appy Nov 2018
Group Project

Positively themed social media application written in React Native. I learned React Native and developed project in 2 weeks from inception to deployment while utilizing Git and GitHub repository for project management.

EDUCATION

Full Stack JavaScript Developer	Exercise Physiology
DevMountain	BYU-Idaho
Immersive web development program focused primarily on the SERN stack	Studies included how the body moves and how to do beneficial exercise
July – Nov 2018	2012 - 2017

EXPERIENCE

UI/UX Developer Intern April 2019 – Present
Mizzen+Main

I quickly learned the templating language Liquid, as well as, the technologies and programming paradigms SCSS, SMACSS, BEM, CSS Grid and Shopify. Designed site pages in Photoshop. I wrote code for the wholesale and retail sites and put together learning materials for new company developers.
